Subject: RE: FMC Request for Appointment

Dear Councilman Edmo:

Thank you for your prompt reply. I wish to be clear -- FMC did not 'consult' with EPA. EPA is the lead regulator for the CERCLA remediation at the Pocatello site and, as such, has authority over all actions at the site related to the cleanup. It was in that context that I met with EPA Region 10.

It is in furtherance of my commitment to improve the FMC/Tribal relationship that I requested the opportunity to visit with you to discuss the same items that were discussed in my visit with EPA Region 10. I am hopeful this meeting can be arranged.

Regards,

Barry

Subject: RE: FMC Request for Appointment

Why wasn't the Tribes consulted with EPA at same meeting? Seems underhanded. Consultation after the fact. BE

Subject: FMC Request for Appointment

Dear Chairman Small,

I'm following up on my earlier commitment to continue our dialogue regarding the remediation of the FMC Pocatello site. This week, I met with EPA Region 10 and provided an update of the construction work performed in 2014, plans for the upcoming 2015 construction season, and the potential for redevelopment of the site. I would like to schedule time to visit with you and the Fort Hall Business Council to discuss these issues as well. Please let me know some dates that would work with your schedule, and I will make plans to visit.

Sincerely,

Barry J. Crawford
Vice President, Operations
